

ANDRÉS BARRIGA

ABOUT ME

As an adept Product Manager, my background in business seamlessly complements my extensive experience in telecommunications and telemedicine software development. I've consistently led products from inception to successful market launches, always with a customer-centric approach. My commitment to driving growth and delivering substantial impact sets me apart.

PROFESSIONAL EXPERIENCE

telemedical solutions

SINNAPtic TELEMEDICAL SOLUTIONS

Full-service telemedical platform which connects healthcare stakeholders to improve quality of life by empowering patients.

FUNCTIONS

- Successfully led a team of 9 members, in building a task-based web platform with focus on API integration and a mobile app using Agile methodologies (Scrum) from MVP to ready to market.
- Gathered requirements, prioritized features, and defined user stories to ensure successful product delivery based on client needs.
- Coached and mentored team members on company and Scrum processes, resulting in improved collaboration and higher quality work.
- Designed and implemented Quality Assurance (QA) processes for software development, including user testing and release documentation.
- Create Scope of Work document for externals, ensuring clear project guidelines and expectations while managing risks through risk assessments.
- Created deployment processes that supported the successful release of software to production environments, managing multiple instances and ensuring system stability and availability.
- Utilized Agile tools such as Jira, Confluence, and Bitbucket, as well as Postgres SQL, to manage the project and ensure efficient collaboration among team members.

* The rest of the work experience can be found on the second page.
